ATTENTION ALL BATH TOWNSHIP PROPERTY OWNERS:
Summit County Surface Water Management District
Program Announcement

A Surface Water Management District has been established for all properties within Bath Township in accordance with Summit County Codified Ordinance Chapter 942.

The purpose of this stormwater utility is to reduce flooding and pollution of the waterways within the District. A Surface Water Management Service Charge based upon $4.00 per month ($48.00 per year) for conventionally developed residential properties and $4.00 per month for each Equivalent Rate Unit (ERU) for non-residential properties will be invoiced annually.

A non-residential property includes parcels improved with more than three residential units and parcels developed for agricultural, commercial, industrial, or institutional use. An ERU is equivalent to 3,000 square feet of impervious surface area such as building, parking, and other hard surfaces.

ERU Credits are available for residential use parcels eligible for Homestead Exemption (25%) and parcels within a Drainage Maintenance Assessment Subdivision (25%).

For non-residential parcels that satisfy the requirements of Section 942.09, an ERU Credit will be calculated by the County Engineer where warranted.

Commercial property owners who disagree with the fees calculated for their property have recourse through an appeals process described in Summit County Ordinance Section 942.12.

Bills will be mailed annually in June. The initial billing will cover the period from July 1, 2018 to June 30, 2019.
